Konstanz Women in Mathematics (KWIM) is a joint project of the Department of Mathematics and Statistics and the Equal Opportunity Council of the University of Konstanz. Its aim is to promote and support female mathematicians across different career levels.

KWIM key activities include:
- organising lecture series featuring mathematical results/biographies of female mathematicians and/or their experience in academia
- creating a meeting point for female mathematicians to promote them in their paths in studies and career
- offering a Women2Women counseling
